Experiencia

Accenture
Developer Associate Manager
octubre de 2024 - Present (1 año)
México

Currently working on the Shell Super App project, focused on integrating the
rewards program and addressing key application issues to enhance user
experience and performance.

Altimetrik
Senior Android Developer
julio de 2024 - octubre de 2024 (4 meses)
México

Paypal Wallet:

The application that connects the PayPal wallet with the phone's wallet for
contactless payments was developed. The integration was successfully
achieved both in the backend and hardware. Version 1.0 is available in the
main PayPal app.

RUUT

2 años 3 meses

Tech Manager / Senior Android Developer
agosto de 2022 - marzo de 2024 (1 año 8 meses)
Ciudad de México, México

Leading a dynamic development team, overseeing more than 10 talented individuals.

Conducting direct technical interviews for all new hires to ensure a high-caliber team.

Played a pivotal role in establishing and optimizing various company processes and structures, including the development workflow, quality assurance (QA) protocols, and bug analysis procedures, leveraging tools like Crashlytics.

Architecting a cutting-edge development framework, I incorporated the latest and best practices in mobile development for both iOS and Android platforms.

Achieved +55k downloads on iOS and +31k downloads on Android.

Implemented and managed event log analysis using AppsFlyer to inform strategic marketing initiatives, leading to innovative solutions and successful lead generation.

Currently overseeing a team with more than 16k active accounts, contributing to the company's continuous growth and success.

Tech Lead / Senior Android Developer
enero de 2022 - agosto de 2022 (8 meses)
651 Broad St, Middletown, DE, 19709

I created functionalities including login, onboarding, buying and selling stocks, investment advisory, news, exploration, portfolio management, user profile, legal components, and integrated SDKs such as INCODE, Intercom, among others.

I developed the Minimum Viable Product (MVP) of the Android application.

I established communication with Alpaca Broker to facilitate the buying and selling of stocks on the American stock exchange.

I had the opportunity to assemble RUUT's inaugural team, where I recruited Android, iOS, and Backend Developers. Throughout this experience,

I demonstrated consistent personal and professional growth.

Globant
Android Developer
junio de 2021 - enero de 2022 (8 meses)
Ciudad de México, México

Projects:

- Prisma (June - November):
Developed various applications for Prisma, focusing on enhancing the shopping experience through Point of Sale (POS) terminals with LaPos. These applications were created as part of Globant México's collaboration with Prisma.

- Disney (November - January):
Engaged in the development of APIs using Kotlin and Android SDK for the ActiveX and Spoton projects at Disney. These initiatives aim to leverage cutting-edge technologies for optimal functionality and user experience.

CITI
4 meses

Software Analyst
mayo de 2021 - junio de 2021 (2 meses)
Ciudad de México, México

Support with the analysis of the new requirements for the development of the RAM project (Mobile Friend Recharge).

Backend Developer
marzo de 2021 - mayo de 2021 (3 meses)
Ciudad de México, México

I develop the backend logic for the RAM project with Telcel.

I help the development team while Android features are required.

Nova Solutions
Android Developer / iOS Developer
marzo de 2020 - julio de 2020 (5 meses)
Cuauhtémoc, Distrito Federal, México

*** Android Developer:

- The SDK adoption application was created using Banxico's CoDi technology for Banco Sabadell from scratch in Kotlin, MVVM and data security.

*** iOS Developer:
- The SDK adoption application was created using Banxico's CoDi technology for Banco Sabadell from scratch in Swift, MVC and data security.

ix Agency
Android Developer / iOS Developer

noviembre de 2019 - marzo de 2020 (5 meses)
Reforma 26

*** Android Developer:

- Banco Famsa: I developed the app that implements Banxico's technology (CoDi), the app was developed from scratch in MVP, Kotlin and applying security in Android.
- Consubanco Pay: I developed the app that implements the CoDi SDK in Kotlin, MVP and applying security in Android.
- Moniic: I developed the app base from Ix Agency that implements CoDi among other functionalities (in approval) and it was completed in 85% of the total development.

*** iOS Developer:
- Banco Famsa: Errors in the views.
- Consucanco Pay: Security classes and data encryption.

Areté Software
